Texting and walking can be dangerous to your health!

U.S. accidents between 2004 and 2010 involving phone-distracted pedestrians.

Over the past few years, serious pedestrian incidents have occurred at Stanford Campus crosswalks, stairways, and walkways.

Campus traffic and construction activities continue to increase.

Walking Safety “Steps”:

- **BE AWARE** of your surroundings
- **STOP** if you need to use the phone
- **AVOID** headphone use while walking, especially in high-traffic areas
- **LOOK** both ways for oncoming car/bicycle traffic
- **USE** stair handrails (indoor/outdoor, busses)
